

CONFIDENTIAL SHREDDING

If your business handles personal or sensitive data, you have a responsibility to keep it safe from identity theft and data breaches under GDPR Regulations.

Our nationwide confidential disposal services are fully accredited to the highest standards, giving you confidence in using a professional and experienced secure disposal company.

Services include:

Collection by uniformed, security-trained personnel

On-site shredding allows customers to witness destruction live on site

Off-site destruction where confidential waste is safely transported to our high security shredding depot for same-day destruction

Accredited to ISO 9001, ISO 14001, ISO 45001 and ISO 27001. Confidential data destroyed to EN15713 standards

Secure Chain of Custody and Certificate of Destruction documentation is provided as standard

Product destruction services for branded goods that are no longer needed, along with faulty and counterfeit items to protect your brand

Secure IT and asset destruction disposing of electronic equipment containing confidential or sensitive data

Increasing your environmental credentials through recycling and recovery of all materials to the highest standards
